

Quality Policy

Our mission is to differentiate West African Ventures Limited (WAV) from our competitors by making Quality a priority in all aspects of our activities so as to deliver satisfaction to our internal and external stakeholders

WAV is a 100% Nigerian Company that is leading in Marine, Engineering, Procurement, Installation and Commissioning (EPIC)-Contracts for oil and gas companies in West Africa. We provide clients with a full range of services from Engineering, Project Management, Procurement, Fabrication, Offshore Installation and Testing services.

Our policy is to ensure we understand our clients' needs, deliver products and services that satisfy or exceed their expectations by meeting specified Quality requirements within the constraints of our contracts and in accordance with applicable client specifications, codes and standards, statutory and regulatory requirements.

To ensure that the above is accomplished, WAV Management has put in place Quality Management System processes which are developed and implemented to comply with the requirements of the International Organization for Standardization throughout the business Units

WAV Management has therefore put in place Quality Objectives which it expects all personnel within the organisation to achieve.

These objectives are:

- Personnel should provide confidence to WAV Management that intended Quality requirements of products and services rendered to clients is at all times achieved and continually improved upon.
- Personnel should provide confidence to clients that all their requirements as regards products and services delivered to them have been achieved.

WAV is committed to continually improving the effectiveness of our Integrated Management System through the proactive identification and implementation of improvement opportunities. WAV Quality process is pivotal to effective business operations and meeting customer expectations.

Michael Amaeshike
Managing Director
