

Quality Policy

Our mission is to differentiate West African Ventures Limited (WAV) from our competitors by making Quality a priority in all aspects of our activities, supporting our strategic direction to grow as a leading indigenous EPIC and Marine Offshore Service Provider in Nigeria and West Africa – including our expansion into deep-water operations and international markets – while delivering satisfaction to our internal and external stakeholders.

WAV is a 100% Nigerian Company that is leading in Marine, Engineering, Procurement, Installation and Commissioning (EPIC) Contracts for oil and gas companies in West Africa. We provide clients with a full range of services from Engineering, Project Management, Procurement, Fabrication, Offshore Installation and Testing services.

Our policy is to ensure we understand our clients' needs and deliver products and services that satisfy or exceed their expectations by meeting specified Quality requirements within the constraints of our contracts and in accordance with applicable client specifications, codes and standards, and statutory and regulatory requirements.

To ensure that the above is accomplished, WAV Management maintains Quality Management System processes, developed and implemented to comply with the requirements of the International Organization for Standardization, as part of WAV's Integrated Management System (IMS), applied consistently across all Business Units.

This policy provides the framework for establishing and reviewing measurable Quality Objectives at relevant functions and levels across WAV. Objectives are set, monitored and reviewed as part of WAV's management review process and address, at a minimum:

- On-time, in-specification delivery of projects and services to clients.
- Reduction of non-conformities, defects and rework across engineering, fabrication and installation activities.
- Customer satisfaction and timely resolution of client feedback and complaints.
- Competence, training and development of personnel supporting Quality performance.
- Compliance with statutory, regulatory, client and contractual requirements, and growth of local content and indigenous capability in support of WAV's expansion into deep-water and international projects.

WAV Management has therefore put in place the following Quality Objectives which it expects all personnel within the organization to achieve:

- Personnel shall provide confidence to WAV Management that intended Quality requirements of products and services rendered to clients are at all times achieved and continually improved upon.
- Personnel shall provide confidence to clients that all their requirements as regards products and services delivered to them have been achieved.

WAV is committed to continually improving the effectiveness of our Integrated Management System through the proactive identification and implementation of improvement opportunities. WAV's Quality process is pivotal to effective business operations and to meeting customer expectations, and supports our ambition to be recognized as a global EPIC and Marine Offshore Service Provider of choice.

This policy is communicated and understood at all levels of WAV and is available to relevant interested parties on request. It is reviewed periodically for continuing suitability.

Michael Amaeshike
Managing Director
